

JUAN PABLO RODRIGUEZ AVALOS

SOFTWARE ENGINEER

PROFILE

Engineer egressed from the polytechnic university of quintana roo. Currently working in development and maintenance of web applications.

FORMATION

SOFTWARE ENGINEER	2019-2023
-------------------	-----------

Universidad Politécnica de Quintana Roo

EXPERIENCE

Dapper Technologies	Sep 2022 - Now
---------------------	----------------

Company dedicated to custom web development, maintenance and improvement of own or third party projects.

Starting as part of my internship, I worked on the development of a PWA for a poker game with real-time multiplayer functionalities using Angular, Node JS, Express, MongoDB, Firebase and Socket.IO using Git Hub as version manager. Since then I have been actively involved in the development area in several websites and web applications using the MEAN stack and technologies such as WordPress and Laravel. Currently I am in the CI area helping in the maintenance and improvement of different projects.

Capital 28	Sep 2021 - Dec 2021
------------	---------------------

Company dedicated to web development for different real estate projects.

I did a professional internship developing the front end in the Vue Nuxt framework and the Vuetify style library of a web application that allows send messages by email or WhatsApp to customers using different templates. This application had features such as autocomplete messages with the information of each client and a logs system for each message sent.

SKILLS

- Angular
- Node JS
- Mongo DB
- Express
- Web Design
- GitHub/GitLab
- WordPress
- B1 English Level
